

Cost Estimator for Argent International:

What we do:

We are a 3M Preferred Converter and specialized in designing, fabricating, and distributing a wide variety of custom adhesive and die-cut solutions for over 40 years! Through a wide variety of converting technologies, we offer a diversity of products, ranging from simple die cut tapes, seals, and gaskets, to fully-assembled sub-components. We utilize over 250 different raw materials, used for Attachment, Buzz, Squeak & Rattle / NVH, EMI Shielding, Fastening, Gasketing & Sealing, Labeling, Printing & Identification, Masking, Safety, Surface Protection, and Wind Noise / Sound Dampening.

What we need:

The Cost Estimator is responsible for the estimating process. The Cost Estimator assures the timeliness, accuracy, and efficiencies of all quotes. The Cost Estimator is responsible to design parts that conform to all customer requirements. The Cost Estimator obtains tooling cost and timing and chooses vendor. This position reports to the Estimating Manager.

What you'll do:

- Review Requests for Quote (RFQs).
- Review customer supplied print.
- Obtain material costs and determine part layout, per customer requirements.
- Verify material meets specification, per customer requirements.
- Complete customer specific cost breakdowns.
- Process new Internal Part Numbers (IPN's) and the reactivation of inactive IPN's.
- Process manufacturing sample requests and engineering changes.
- Understand equipment capability and determine the most economical manufacturing method.

What you'll need:

- Experience in the automotive/manufacturing industry
- Strong communication skills, ability to work well with teams and upper management
- PLEX experience extremely beneficial
- Strong leadership and team skills and a high desire to excel
- Strong computer skills
- High School Diploma or GED minimum, Technical Degree or Equivalent preferred
