Exterior Applications

Every vehicle produced needs a perfect finish; our films are designed to maintain that finish throughout the assembly lifecycle. Class A surfaces require protection from damage and dirt in the plant, during transit, and throughout the customer buying process.

Our films are made to protect high-gloss finishes, painted plastic parts, and polished metals.

Interior Applications

People drive their cars daily and care, more than ever before, about the interior of their vehicles. One minor defect caused by poor packaging can make a difference between a happy customer and a rejected part.

At Pregis PolyMask™, our product solutions team can help match the proper temporary protective film for the broad variety of surfaces in the interior of a vehicle. Including textured and smooth plastics, painted or polished metals, carpet, glass, and more.
